ORGANIC FOOD SYSTEM PROGRAMME

A CORE INITIATIVE OF

**Sustainable
Food Systems
PROGRAMME**

Food production linked to
loss in biodiversity

← Food consumption linked to
gain in weight →

Our current global
problems related to food:

- 795 million people are hungry
- 1,9 billion people are suffering from overweight and obesity

How do Organic Food System contribute to enhance sustainable food system + healthy diets

OFSP and the 17 SDG's

To ensure sustainable production and consumption patterns

Organic is a global agro-food system

100 years of experience

From vision to metrics

Data recorded annually >160 countries

Legislation in >80 countries

Organic hectares worldwide

ORGANIC FOOD SYSTEM PROGRAMME

A CORE INITIATIVE OF

The organic agro-food system values

- Shared mission values

The four principles of health,
ecology, fairness and care

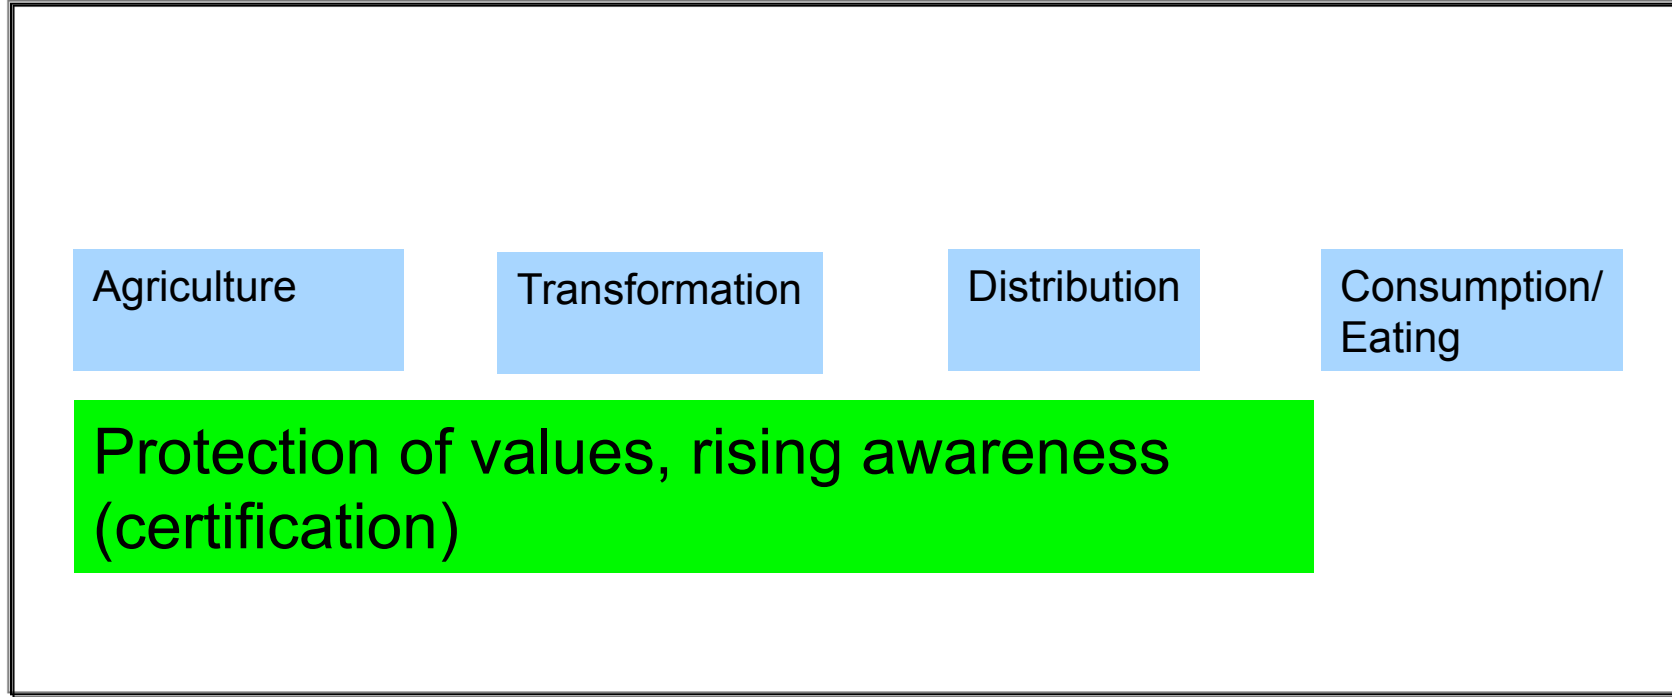

- Shared operation values

Transparency, integrity, trust

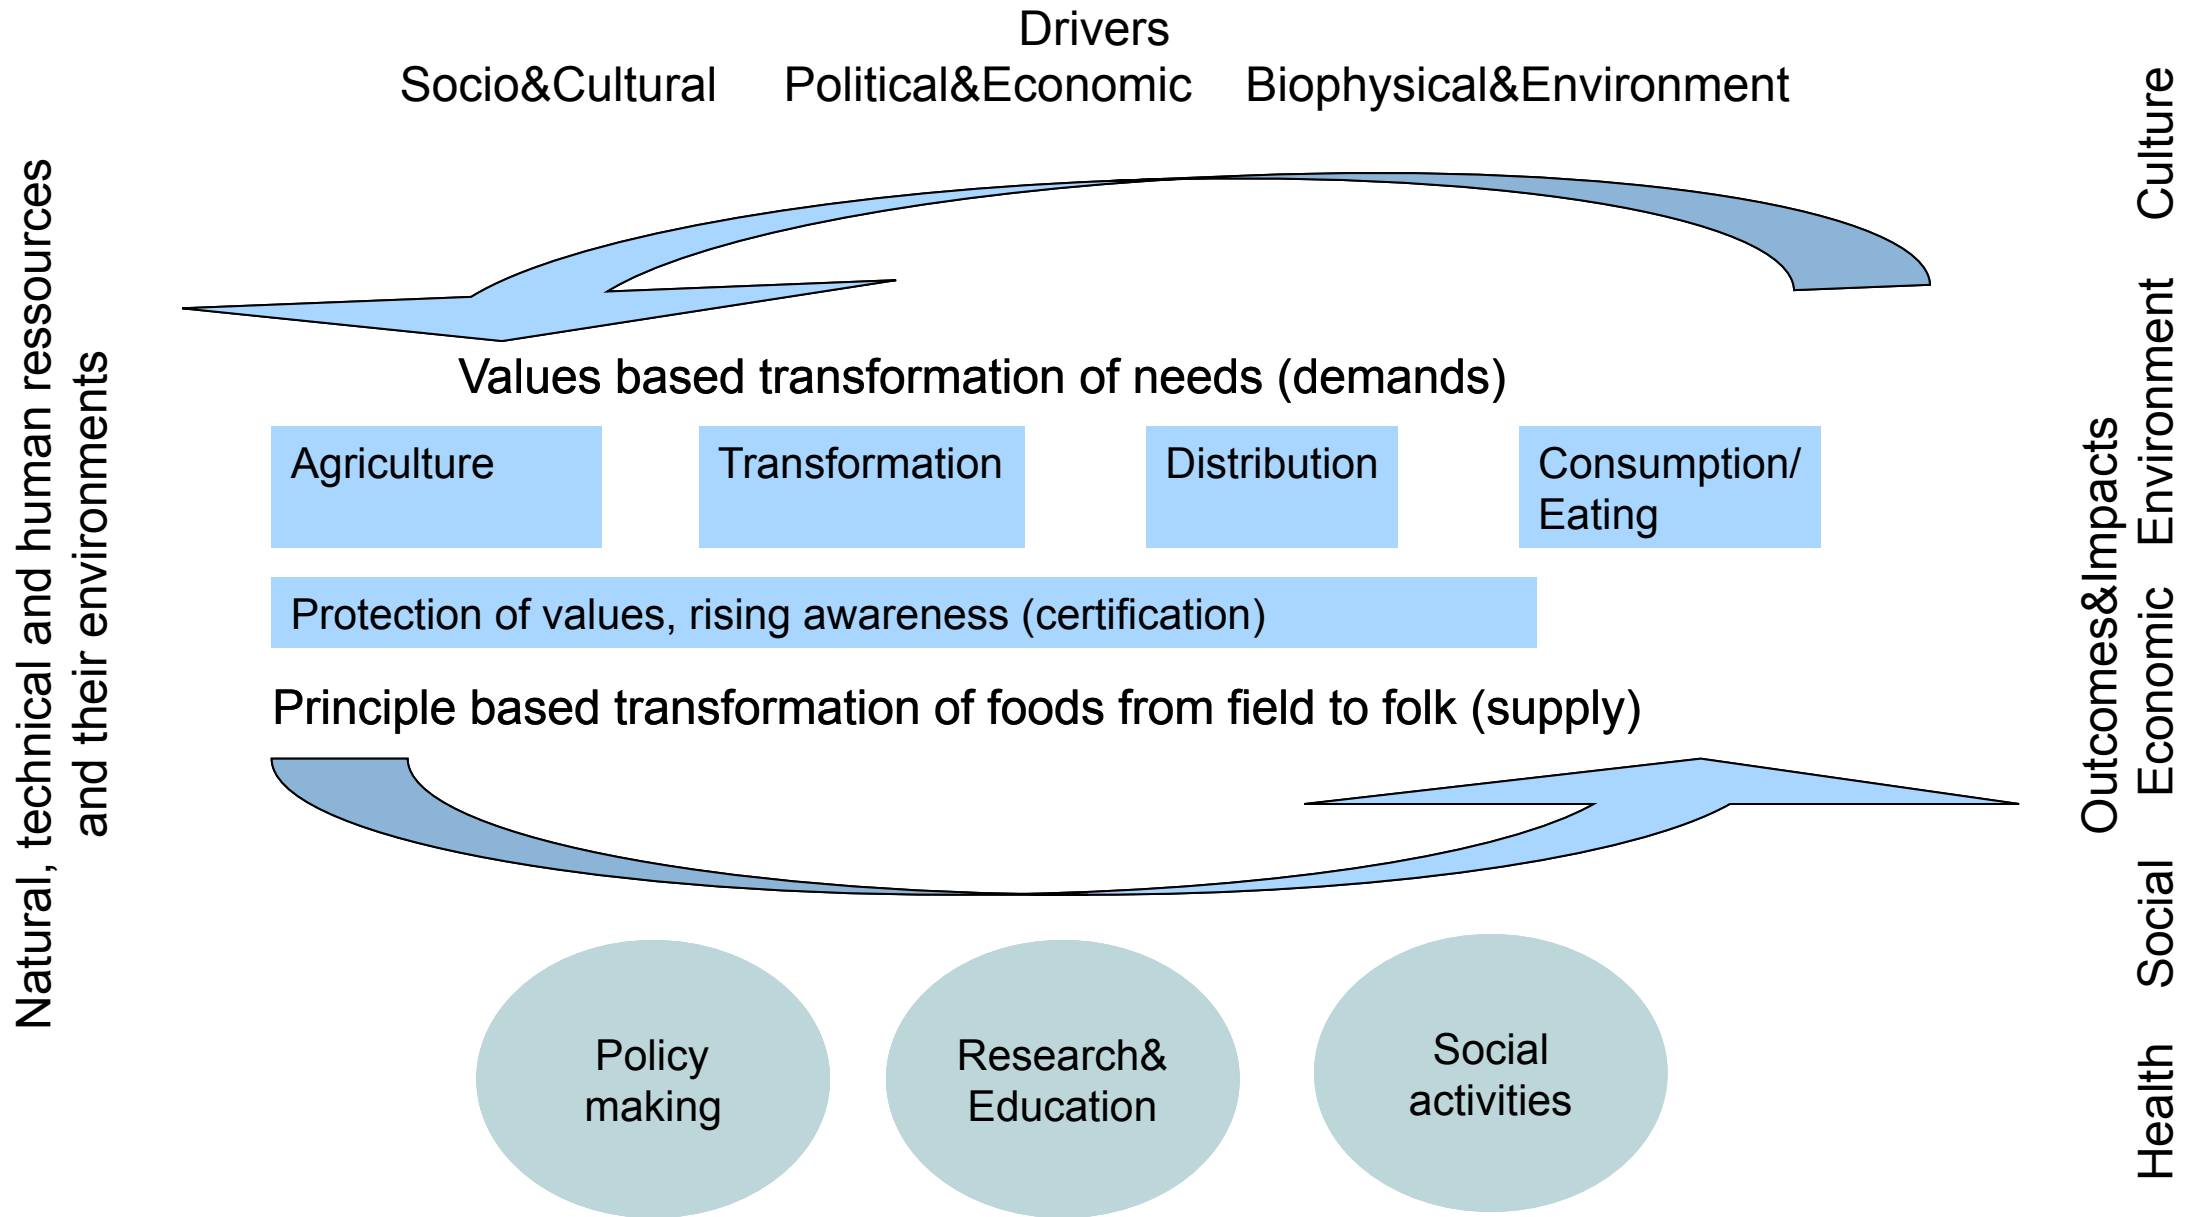

Organic beyond farming: Model for a sustainable food system

Natural, technical and human resources
and their environments

Outcomes&Impacts
Health Social Economic Environment Culture

The OFSP: What is it doing?

Conceptualising food systems, using organic

- Scientific underpinning, identification of drivers etc.

Modelling and assessing food systems

- The methodological work

Education and training

- Development of multi-target tools

Transformation in practice

- Case studies OFSs around the world

Communicating and disseminating

- Spread, exchange through web, reports, papers and meetings

Innovative Education towards
Sustainable Food Systems

ORGANIC FOOD SYSTEM PROGRAMME

OFSP: Core projects to ensure 8 deliverables towards UN-10YFP

Case studies OFS around the world

Local OFS and Food Hubs

Education and training

Welcome to join
and contribute!
