Organic Food System Programme – Driving Sustainable Food Systems Worldwide

2022-2024 The Organic Food System Programme Second Report Full Report

A contribution of the UK Sustainable Food
System Programme to the One Planet Network

LOOKING BACK & MOVING FORWARD: A Year of Progress: 2022- 2024 Report Highlights

The Organic Food System Programme (OFSP) has made significant strides during the 2022-2024 period by focusing on:

- **Building a Global Knowledge Base:** Enhancing research, data collection, and the sharing of organic food systems insights worldwide.
- **Mapping Organic Food Systems:** Developing a comprehensive census of organic food systems in various regions.
- **Expanding Educational Resources:** Creating accessible courses and training modules to spread sustainability knowledge.
- **Advancing Scientific Research:** Investigating the benefits of organic diets and production systems through innovative projects.
- **Strengthening Data and Reporting:** Enhancing the support base for organic policies and practices.

These achievements are the foundation for our continued growth and global collaboration in sustainable food systems.

In November 2024, the International Research Association for Organic Food Quality and Health (FQH) hosted an inspiring conference in Copenhagen. Leading experts from around the

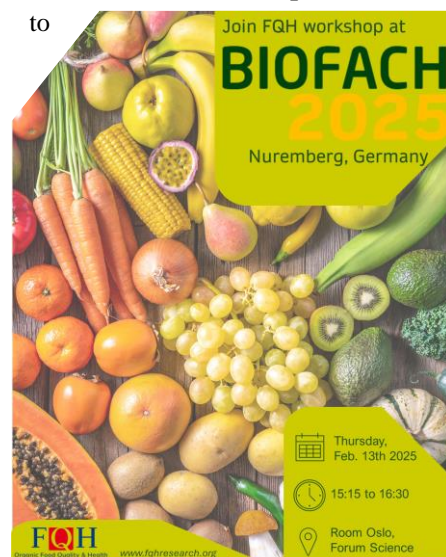

world gathered to discuss cutting-edge research, sustainability policies, and the global role of organic food systems.

This event set the stage for future collaborative efforts and will influence

upcoming initiatives at BIOFACH 2025.

**UPCOMING EVENTS
& FUTURE DIRECTIONS**
Join Us at BIOFACH 2025
 – OFSP Workshop, Feb. 2025

OFSP is thrilled to announce the FQH workshop at BIOFACH 2025, taking place in Nuremberg, Germany on 13th February 2025. BIOFACH is the world's leading organic food trade fair and offers an unmatched platform for:

OFSP 2025 NEWSLETTER

Organic Food System Programme – Driving Sustainable Food Systems Worldwide

- **Networking with Global Experts:** Engage with researchers, practitioners, and policymakers.
- **Showcasing Innovations:** Share and learn about breakthrough research and sustainable practices.
- **Interactive Sessions:** Participate in our hands-on workshop and panel discussions aimed at transforming local and global food systems.

Looking Ahead: Strengthening Global Impact

In 2025, OFSP will continue to expand its reach by:

- **Enhancing Collaborative Research:** Deepening partnerships across continents to foster community-led projects.
- **Influencing Policy:** Working with governments and organizations to shape sustainable food policies.
- **Expanding Education Initiatives:** Launching new training programs to empower the next generation of food system leaders.
